## EXPERIENCE

---

### Associate Software Developer

Echidna Software Private Limited

2021 Dec – On Going

Bangalore

#### Personal Portfolio Website (React Js)

- Designed and developed a responsive portfolio website to showcase my web development projects and skills.
- Technologies Used: React.js, JavaScript, HTML5, CSS3, and Git.
- Modular Components: Implemented a modular and reusable component structure to ensure maintainability and scalability of the application.
- Responsive Design: Ensured seamless performance and accessibility across various devices and screen sizes using CSS Flexbox and media queries.
- Performance Optimization: Optimized the website for faster load times by leveraging lazy loading for images, code splitting, and minification techniques.
- Achievements and Outcome: Demonstrated proficiency in React.js and front-end technologies by successfully developing and launching a live project.
- Improved personal branding and visibility, leading to increased engagement with recruiters and professional networks.
- Gained hands-on experience with development workflows, including version control with Git, debugging, and responsive testing.

#### Katalog project (React Js & Magento 2)

- Collaborated with a team to build a scalable and modern eCommerce application using React.js for the frontend, integrated with Magento 2 via GraphQL API for backend functionalities.
- Technologies Used: React.js, TypeScript, Apollo Client (GraphQL), Vite, CSS3, Git, Magento 2.
- Used Apollo Client to handle GraphQL queries and mutations, enabling seamless communication with the Magento 2 backend.
- Worked closely with UI/UX designers to translate wireframes into responsive and interactive web pages.
- Optimized application performance through code splitting, lazy loading, and caching GraphQL queries.
- Conducted code reviews, wrote unit tests, and participated in Agile ceremonies like sprint planning and retrospectives.

#### Jessup Manufacturing, Front Point, Continental Battery

- Collaborated with UX designers, backend developers, and project managers to ensure consistency and accuracy of website designs.
- Upgraded Magento 2 sites to the latest version, resulting in improved performance and increased functionality. Conducted thorough testing of upgraded sites to ensure all features and functionalities were working correctly.
- Provided training and support to clients and internal teams on the upgraded Magento 2 platform.
- Implemented responsive designs and optimized website performance for fast loading and excellent user experience.
- Optimized website performance by identifying and resolving code conflicts, improving page load times, and implementing caching mechanisms.
- Integrated third-party extensions and custom modules to enhance website functionality.
- Worked with project managers to prioritize tasks, meet deadlines, and deliver high-quality code on time and within budget.
- Provided technical guidance and support to junior developers and mentored them in best practices for Magento 2 development.
- Proficient in Magento 2 development, including theming, customization, and performance optimization.
- Familiarity with Agile methodologies and project management tools Jira.
